Honors-Awards

Letter of Recommendation –
Olcademy
Paper Presentation Winner –
TRIGGER 2K21
Engineering Hero Recognition | Q4
2023
Engineering Hero Recognition | Q3
2024
Runner-Up — Aakash Hackathon
2026

S K Santhosh Kumar

SSE @AESL | BMSCE'22
Bengaluru, Karnataka, India

Summary

Passionate full stack developer with strong ownership across the design, development, and optimisation of scalable systems. Experienced in building user centric products while continuously deepening expertise in modern technologies. Actively practicing data structures and algorithms, with a strong problem solving mindset and a commitment to writing clean, efficient, and maintainable code to deliver reliable, high quality software.

Experience

Aakash Educational Services Limited
3 years

Senior Software Engineer
April 2024 - Present (2 years 4 months)
Hyderabad, Telangana, India

- Built an in-house CRM platform managing complete lead and opportunity lifecycles (CRUD + insights) with global search across name, phone number, and PSID, significantly reducing Salesforce dependency and licensing costs.
- Developed a nested practice test platform where tests include only incorrectly attempted questions, and each question dynamically unlocks a set of related sub questions to enable focused, concept level practice.
- Implemented a dynamic test generation system allowing users to create customised practice tests by selecting subject, chapter, topics, and difficulty level, enabling personalised, self paced learning.
- Designed and implemented a context-driven Service Request (SR) flow exposing only relevant services per student, with adaptive Help Guides (PDF/ video) to enable self resolution and a no code Help Guide Management API for real-time business updates.

Publications

Design and Simulation of Voice Controlled Robotic Car

- Led major codebase optimisations and architectural revamps, improving performance, readability, and long-term maintainability across multiple modules.

Software Engineer

August 2023 - March 2024 (8 months)

Hyderabad, Telangana, India

- Built a standardised, secure online test platform reused across web and Android/iOS webviews, ensuring reliable MathJax rendering and fullscreen exam integrity. Implemented strong security controls, multi question support, custom numeric keyboard, session validation, and inactivity handling. Delivered end-to-end test and result flows with resume, auto/manual submission, and rich performance analytics. Ensured platform stability through Playwright based end-to-end and integration testing.
- Designed a variant of the main test platform with a different user experience and purpose, this platform allows users to attempt the same test multiple times for practice. Implemented a dedicated practice analytics experience with enhanced result insights tailored for repeated attempts and learning focused analysis.

BYJU'S

Software Engineer

July 2022 - July 2023 (1 year 1 month)

Bengaluru

- Built a responsive in app doubt chat supporting subject specific text and image queries with validated attachments. Integrated ML generated solution suggestions with pagination, resolution actions, and expert escalation when needed. Reused the chat across app webviews to ensure consistent behavior and accurate MathJax rendering.
- Developed an internal feedback system where the modal auto triggers for new users and is accessible via a dedicated CTA for existing users, enabling continuous product improvements based on real user feedback.
- Designed and implemented a secure webview based payment flow that listens to client side events and handles CCAvenue transactions, including payment initiation, status tracking, and callback handling.
- Implemented a backend driven, configurable NPS system with dynamic questions, auto triggered on first login and resurfaced at configurable intervals

if unsubmitted. Extended NPS collection to email and SMS via secure links, reusing core in app components with alternate authentication handling.

Karnataka Power Transmission Corporation Limited

Electrical Engineering Apprentice

May 2022 - June 2022 (2 months)

Bengaluru, Karnataka, India

The Karnataka Power Transmission Corporation Limited, also known as KPTCL, is the sole electricity transmission and distribution company in the state of Karnataka.

Apprenticeship under the topic "220/66KV SUBSTATION MAINTENANCE & EQUIPMENTS AT KPTCL" included detailed understanding and hands-on experience in Receiving substation maintenance, Lightning arrestors, CVTs, Circuit breakers, Isolators, Wave traps, Relays, Transformers, Transmission, and Distribution systems.

Olcademy

Software Testing Intern

July 2020 - October 2020 (4 months)

New Delhi

- Performed manual testing of the Olcademy e-learning platform to identify functional, UI, and responsive issues.
- Designed and documented test cases and test scenarios to ensure comprehensive test coverage.
- Collaborated with the team to report, track, and validate bug fixes across different modules.
- Conducted module walkthroughs and demonstrations to explain functionality and testing outcomes.

Education

B. M. S. College of Engineering

BE - Bachelor of Engineering, Electrical and Electronics

Engineering · (2018 - 2022)

Christ University, Bangalore

PUC, PCME · (2016 - 2018)
